

Week 6 — Deliverable 2: Registration Form & Success Response

Intern ID: TBI-26100587 | POST /api/auth/register — Passwords hashed using bcrypt (10 salt rounds), returning HTTP 201 Created.

The image shows a live browser capture of the RevLens AI website. The left side of the browser window displays the homepage, which features a dark blue header with the RevLens AI logo and navigation links (Home, Dashboard, Pricing, About, Login). The main content area has a dark blue background with the text "Your reviews, decoded by AI" and "Join homestay owners who have transformed their guest feedback into actionable insights." Below this are three feature highlights: "93% sentiment accuracy", "Responses in under 3 seconds", and "End-to-end encrypted data". A testimonial from Ananya G., Goa Homestay Owner, is also present.

The right side of the browser window displays the "Create an account" registration form. The form has a white background with a dark blue header. It includes a "Sign in with Google" button, an "OR" separator, and input fields for "Full Name" (with placeholder "e.g. John Doe"), "Email" (with placeholder "you@example.com"), and "Password" (with placeholder "Enter your password"). A dark blue "Create Account" button is at the bottom. Below the button, there is a link for "Already have an account? Sign In" and a small text line: "By continuing, you agree to RevLens AI's Terms of Service and Privacy Policy."

Figure 6.1: Live Browser Capture of User Registration form & HTTP 201 response.

Week 6 — Deliverable 2: User Login & JWT Token Generation

Intern ID: TBI-26100587 | POST /api/auth/login — Credentials validated, signed JWT bearer token returned in Network tab.

Figure 6.2: Live Browser Capture of User Login & JWT bearer token authentication.

Week 6 — Deliverable 2: Protected Route Guard (HTTP 401 & Redirect)

Intern ID: TBI-26100587 | Attempting unauthenticated access to /dashboard redirects to /login with 401 Unauthorized protection.

Figure 6.3: Route Guard middleware catching unauthenticated requests and enforcing authentication.

Week 6 — Deliverable 2: Google OAuth 2.0 Sign-In Integration

Intern ID: TBI-26100587 | Google Identity Services SDK flow landing back on authenticated dashboard with user profile avatar.

Figure 6.4: One-click Google OAuth 2.0 Identity button integration.

Week 6 — Deliverable 2: Rate Limiting Verification (HTTP 429 Response)

Intern ID: TBI-26100587 | Sliding-window IP rate limiter blocking >5 requests/min on /api/auth/login with HTTP 429.

□□ HTTP 429: Too Many Requests

Maximum 5 authentication attempts per minute exceeded for this IP.

Rate Limiting active on /api/auth/login and /api/auth/register.

Chrome DevTools — Network (Filter: Fetch/XHR)					● 2 Requests 0 Failed
Name / Endpoint	Method	Status	Type	Size	Time
/api/auth/login	POST	429 Too Many Request	fetch	180 B	12 ms
/api/auth/login	POST	429 Too Many Request	fetch	180 B	10 ms

Figure 6.5: Rate limiting middleware returning HTTP 429 (Too Many Requests) when threshold is exceeded.
